Inauguration Resistance...

(Continued from front page) Representative Nick Clayman's disapproval of the "lame-duck" approach.

Also voted on, and unanimously endorsed, at Wednesday's meeting was a spontaneous motion made by representative Regina Smith to recognize Dr. Martin Luther King Jr.'s birthday, Jan. 15, as a national holiday.

"All Americans should be remembered after their deaths, and for this reason, their contributions should be enshrined in the calendar of national holidays," Smith stated. This issue is important, she said, because it concerns not only blacks, but other minorities as well.

Votes of the Leg Council support of this issue will be sent to government leaders including Senators Cranston and Hayakawa.

Along with the passage of the two position papers, Leg Council unanimously passed a by-law which will introduce a "buddy system" to make smoother and more effective the transition of power from the retiring Leg Council to the newly elected Leg Council each year.

According to the by-law, "With this new buddy system, each newly elected student representative will pair off with one of the present council members," so the incoming members can be briefed on current issues, the administration hierarchy, parliamentary order, and other aspects of being a representative. "Although idealistic," representative Joan Hjartberg stated, "it is really worth a try, with nothing to lose but everything to gain."

It was also announced at the meeting that responses to the Leg Council position paper disapproving the military occupation of Beirut University in Israel have been received from Senator Cranston, Senator Howard Baker, Representative Robert Lagomarsino, and Representative Gary Hart. The response in effect stated that the information was appreciated and will be taken into consideration.

CCAS Identifies Bounced Checks

(Continued from front page) business located in the "community," Davirrio said that businesses on the system believe it is "fantastic and long overdue." In some cases the number of bad checks accepted by stores have been reduced by 90 percent.

I.V. Market manager Lee Johnson said that "the system is beneficial to us now and we hope it will be more beneficial in the future." The system has a lot of potential because it may help stop the people who purposely write bad checks. Checkers at the markets have a list of the driver's license numbers, addresses, and social security numbers on the list. Checkers, at Isla Vista, and Starbuck are examples of stores not using the Community Check Alert System, however, both companies believe that they utilize satisfactory check writing systems.

The strength of CCAS lies in the cooperation of all by its member stores; as the system grows, it will provide automation, information data base and new members, therefore the protection of such individual company will grow.

Women's Cancer Specialist to Speak in Santa Barbara

On-Campus Interviews:

Friday, Jan. 22nd

The Challenges

You'll be challenged to design and develop computer systems in a fast-paced, high-visibility environment. You'll be working on cutting-edge projects in a dynamic environment.

You'll be part of a team of talented engineers, designers, and developers who are passionate about creating innovative solutions for our customers. You'll have the opportunity to work on projects that will have a significant impact on the world and make a difference in the lives of people around the globe.

You'll work with state-of-the-art equipment and technology, and you'll have the chance to lead projects and take on new challenges. You'll enjoy the satisfaction of knowing that your work is making a difference and helping to shape the future.

You'll work in a dynamic and collaborative environment, and you'll have the opportunity to interact with other engineers and designers across the country. You'll have the chance to learn from experienced professionals and gain valuable experience in the field.

The Environment

You'll work in a state-of-the-art environment, surrounded by cutting-edge technology and equipment. You'll have access to the latest tools and resources, and you'll have the opportunity to work on projects that are both challenging and rewarding.

You'll work with a team of talented engineers and designers who are passionate about creating innovative solutions for our customers. You'll have the chance to lead projects and take on new challenges, and you'll enjoy the satisfaction of knowing that your work is making a difference and helping to shape the future.

If you're interested in a career that lets you work with people who care about making a difference, then Prudential is the place for you. Join us and achieve your goals with us.
